

Supporting Teachers to make Overall Teacher Judgments

The Consortium for Professional
Learning

The Purpose of OTJ workshops

Moderation - To deepen the quality of professional talk in order to establish shared understandings and improve teaching and learning.

To apply evidence based decision making to build the consistency and validity of teacher judgments.

To introduce frameworks as a tool to support decision making.

To provide materials to support professional talk and decision making.

Workshop process

- Review the current context in relation to National Standards
- Discuss key considerations when moderating
- Examine the Frameworks and illustrations – a resource to build greater dependability
- Make an evidence-based judgment using the frameworks
- Engage in professional discussion about judgments

2010

The New Zealand Curriculum

Literacy Learning Progressions & The Number Framework

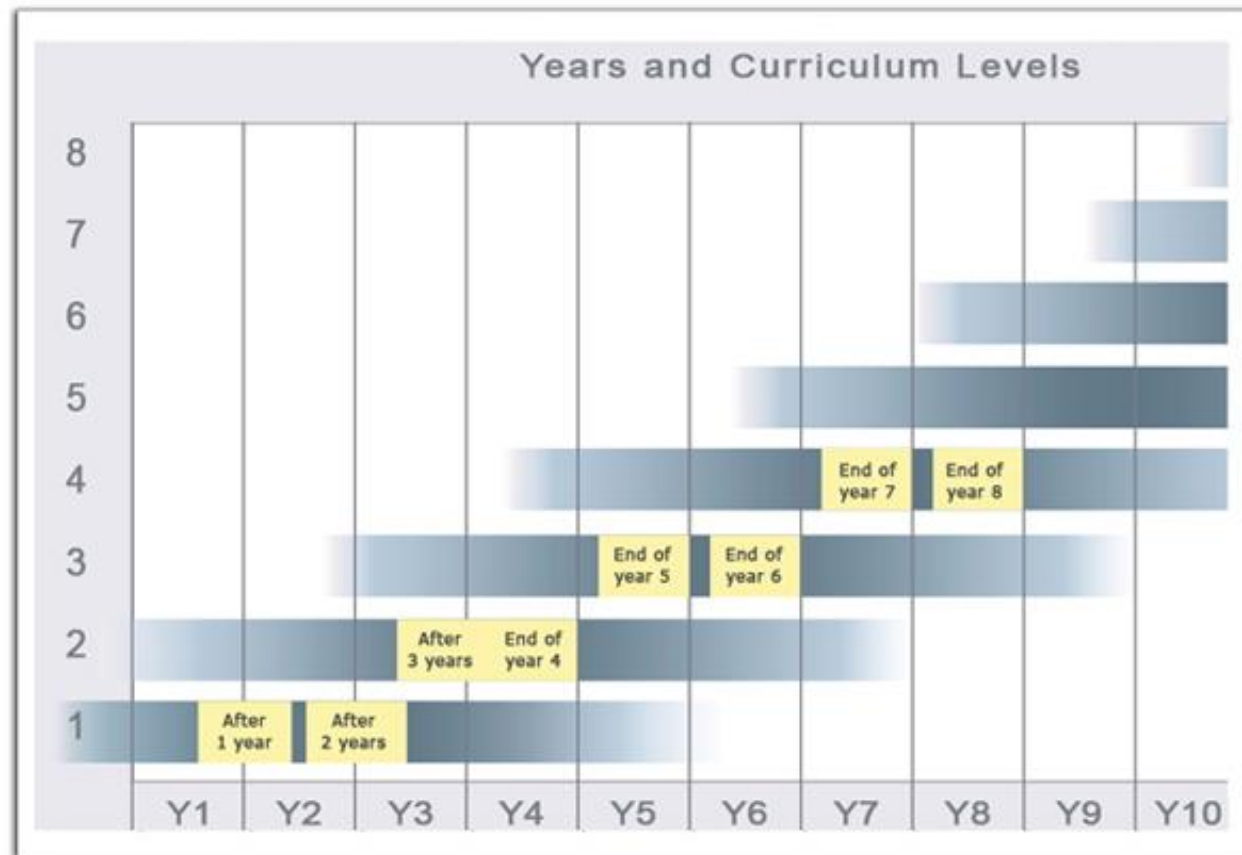

The National Standards

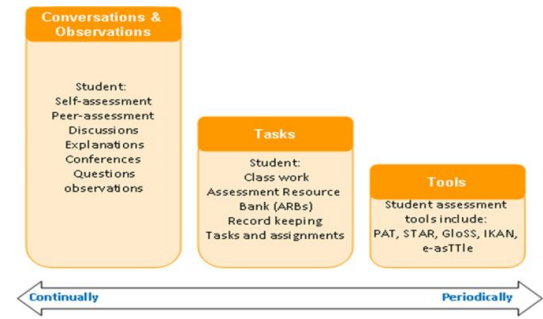

Current context

- Curriculum = outcomes
- Progression documents = indicators
- Standards = signposts for progress

Current context

- OTJs are made using multiple sources of evidence
- Evidence is collected in a variety of ways - learning conversations, observations and assessment tools
- OTJs are made using evidence that show application of the skills, knowledge and understandings across the curriculum
- Consistency is essential to the dependability of OTJs – moderation is the process.

Monitoring and Evaluation Project

- Evidence suggests that OTJs do not yet have dependability.
- This does not mean that all OTJs are inaccurate.
- The inconsistency in teachers' ratings is likely a result of the relatively broad nature of the National Standards scale.
- The report indicates principals and teachers perceive a need for further support around OTJs.

Monitoring and Evaluation Project

- Moderation – more common in the area of writing than reading or maths.
- There has been an increase in the understanding of moderation as an ‘evaluation discussion informed by evidence of student achievement.’
- Number of schools moderating effectively has increased

How do the findings from this report fit with your school's current practice?

Moderation is the process of sharing expectations and understanding of standards in order to improve the consistency of decisions (reaching agreement).

(TKI Assessment)

Professional talk:

- Planned
- Informal

What are the planned and informal opportunities that are currently happening in your school?

Moderation

1. Shared understanding of the reference materials used to make decisions, including definition of terms
2. Shared understanding of progressions in the reference materials
3. Shared understanding of what to notice and recognise when making decisions
4. Processes to ensure judgments in relation to reference materials are made in a similar way.

Moderation is most effective when:

- it is conducted in a **spirit of professional learning and quality improvement** (there may be dissonance).
- teachers have **appropriate knowledge of content area, assessment practices,** and policies and procedures.
- it is carried out regularly.
- it is **begun at the planning stage** -prior to teaching and assessment (ensuring teachers share understandings about important learning and indicators of it).

Framework

Conversations & Observations

Student:
Self-assessment
Peer-assessment
Discussions
Explanations
Conferences
Questions
observations

Tasks

Student:
Class work
Assessment Resource
Bank (ARBs)
Record keeping
Tasks and assignments

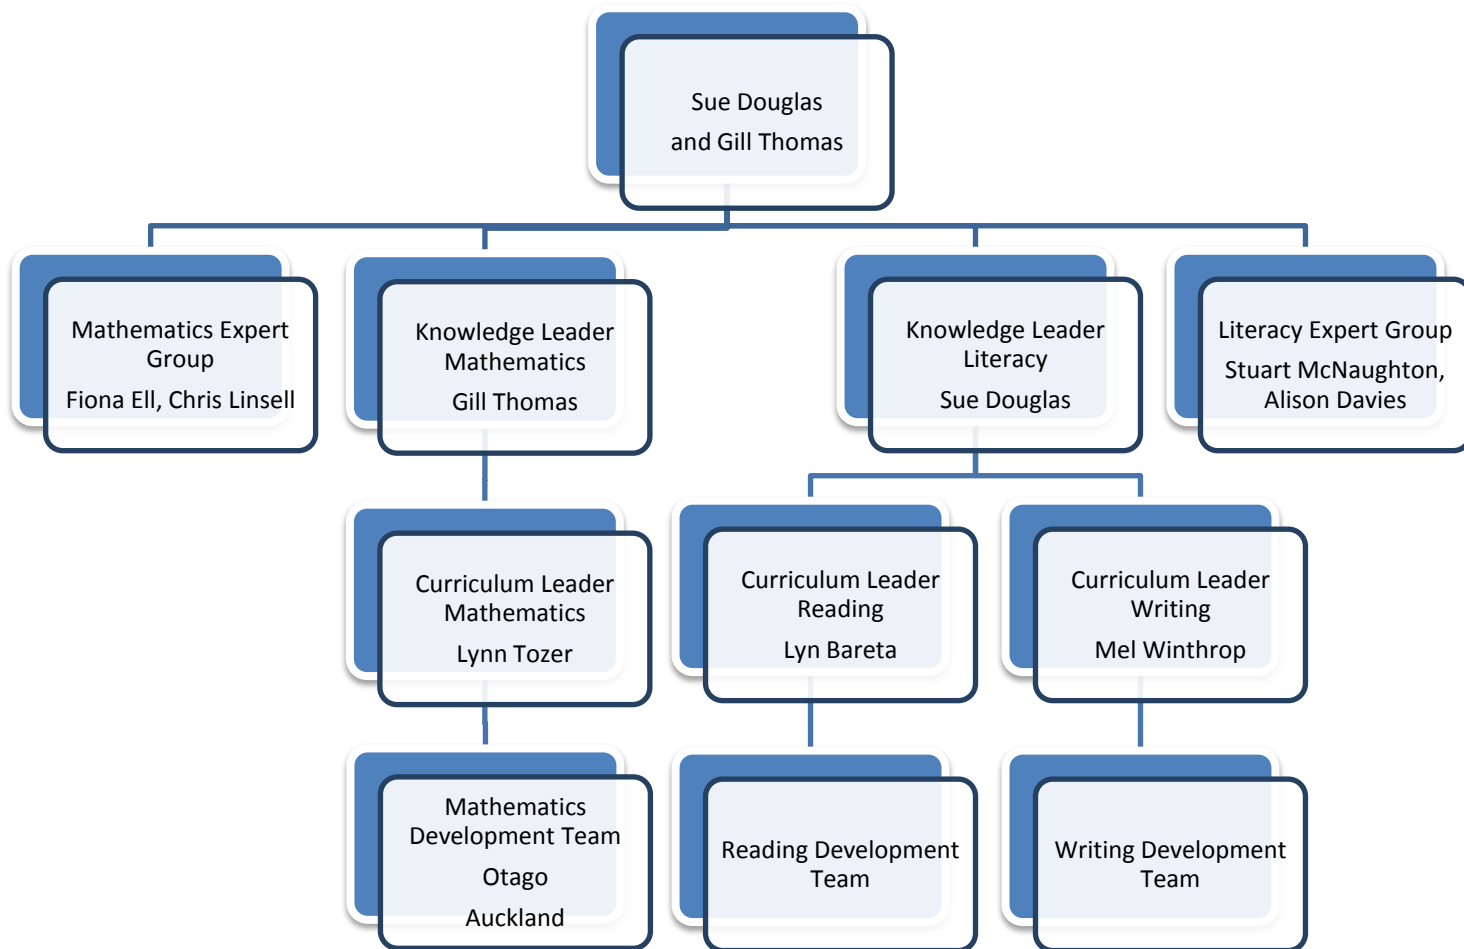

Tools

Student assessment
tools include:
PAT, STAR, GloSS, IKAN,
e-asTTle

Continually

Periodically

Framework Development Team

The components of an illustration

- A unique **title**.
- An **annotation** that highlights the key features of the student response.
- The **problem** (for mathematics) **or the text and task** (reading and writing), which are the focus of the illustration. This also includes the conditions under which the task was completed, for example, independently or with support.
- The **student response** details how and what the student did in response to the problem or task. The response may include a work sample and or a transcript of a discussion with a teacher.

1

Activity One:

Look at the illustrations and become familiar with the components and the type of information they provide.

How does a moderation activity such as this build consistency?

Sets of Illustrations

- The observable steps of learning in each aspect are described through **sets** of illustrations.
- Each **set** has been developed to illustrate big or important ideas in the learning progressions.
- Each **set** describes the important features that teachers should notice and recognise about **what each student knows and can do.**

2, 3

Activity 2

Order these illustrations to show the progression through the learning steps.

- Making sense of text: Vocabulary knowledge (white paper)
- Acquiring and using information and ideas in informational texts (lilac paper)

Activity 2 answers – Making sense of text: Vocabulary knowledge

Bubbles

The Hole in the King's Sock

Where is Aunty?

Dragons! Dragons! Dragons!

Matariki

Our Hero – The Story of George

From Kick Off to Cup

The Emperor of Peka Peka Beach

Activity 2 answers – Acquiring and using information and ideas in informational texts

Dead Goldfish

The Way it Was

Catching Mustelids

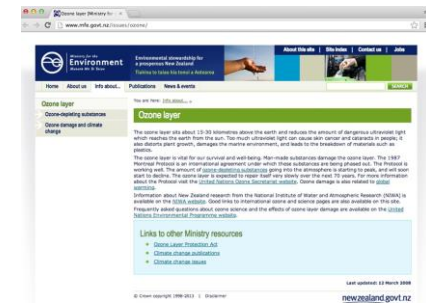

Asthma

The Ozone Hole

Ozone Basics

How does a moderation activity
such as this build consistency?

Illustrations

The illustrations are **NOT** assessment tasks to see if students can do them.

They should prompt questions such as:

- What evidence do I have?
- Is this the type of level that _____ could demonstrate?
- Is this the '**kind of way**' that _____ would solve these problems?
- Is this the '**kind of way**' that _____ would write ideas, experiences or information
- Is this the '**kind of way**' _____ would respond to a text

3

Activity 3

Use the material provided , or the evidence and knowledge you have brought for a student in your school, to make a decision about the student’s achievement in relation to Aspect 3: Making sense of text: vocabulary knowledge.

Purpose

To use professional talk as a form of moderation

Activity 4

Align the illustration and the knowledge/evidence to the Literacy Learning Progressions and the National Standards illustrations.

Using the frameworks to support moderation

- Moderate what?
 - aspects teachers are finding difficult
 - sample selection of students.
 - students for whom making aspect decisions was difficult (gaps in evidence or *where making a decision about a student's achievement was difficult*)

The value of common frameworks

- Builds consistency of what to notice and recognise
- Highlights gaps in learning opportunities
- Gives a consistent framework within and across schools
- Progress through learning steps is made visible

4

Moderation – systems and processes

How is moderation organised in your school?

- When does moderation need to take place?
- Who is involved?
- Within school / across schools?

[Examples of student reporting cycles](#)

Within and across schools

Within teams

Team meets to identify and analyse distinctions between levels of curriculum or standards

Compare samples of student work at the current Standard, previous, and the next Standard

Across teams or school(s)

Compare samples between teams/schools; discuss similarities/differences

Clarify understanding of progression statements (actual or desired?) so teachers operate from shared understandings

Quality moderation involves:

Professional respect and trust

Open-mindedness to new information and perspectives

Commitment to dependability of judgments

Agreed reference materials

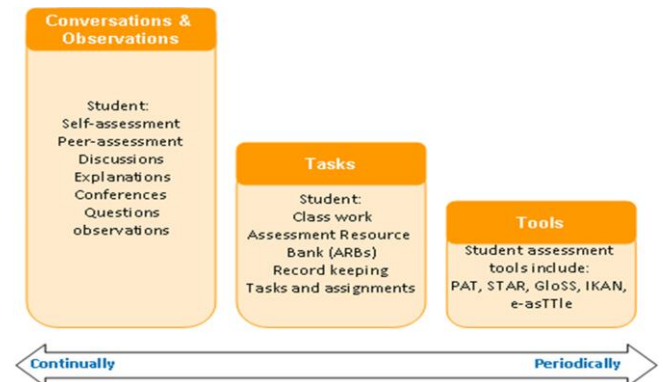

Evidence-based discussion

Multiple forms of evidence

4

Role of standardised tools

- Standardised test information is an important form of evidence and has a function in moderation.
- For example, correlation between standardised tool and OTJ can provide a degree of confidence.
- Non-correlation does not necessarily mean an OTJ is incorrect.

Reflection

Consider Handout 1 and the four facets of moderation.

In what ways will this workshop impact on moderation practices in your school?

- What are your current strengths? (as an individual, as a team, as a school, as a community of schools)
- What are your next steps in building dependability?
